About Us

Prospect House provides Residential Crisis Support, which is a voluntary, short-term residential program for individuals who are experiencing a mental health crisis and/or are experiencing challenges in daily life that create risk for escalation of symptoms that cannot be managed in the individual’s home and community environment without onsite supports. Prospect house is designed to assist potential guests in alleviating an emotional crisis that could lead to hospitalization or as a step-down option coming out of the hospital before returning home. Our house is equipped with a variety of proactive tools, both traditional and non-traditional, to help support and sustain each guest’s well-being. The length of stay will be determined upon checking in, with the average stay being 5-7 days. Each guest will receive twenty-four-hour support from our program staff. Participation in the program is voluntary.
